

The background of the entire page is a photograph of the Aurora Borealis (Northern Lights) over a mountain range. The aurora is a vibrant, ethereal display of light in shades of green and blue, dancing across the dark night sky. Below the aurora, the silhouettes of mountains and a forest are visible against a dark, starry sky.

Cautionary Statement

This management presentation (the “presentation”) is not a prospectus, offering memorandum or an advertisement and was prepared as a summary overview only of the current affairs of First Nordic Metals Corp. (“First Nordic Metals”). This presentation, and the information contained herein, is not for release, distribution or publication into or in the United States or any other jurisdiction where applicable laws prohibit its release, distribution or publication.

CONFIDENTIALITY

Securities legislation in all provinces and territories prohibits such unauthorized distribution of information. Each recipient of the information contained in this presentation will treat such information in a confidential manner and will not, directly or indirectly, disclose or permit its affiliates or representatives to disclose such information to any other person or reproduce this presentation in whole or in part, without the prior written consent by First Nordic Metals.

TECHNICAL REPORTS

This presentation includes disclosure of scientific and technical information concerning the First Nordic Metals mineral projects from technical reports (“technical reports”) prepared in accordance with Canadian NI 43-101 - standards of disclosure for mineral projects (“NI 43-101”), which is available on SEDAR at www.SEDAR.Com under each of Barsele Mineral Corp.’s and Gold Line Resources Ltd.’s corporate profiles. Investors are cautioned to review the following technical reports:

For further information regarding the Barsele project, reference should be made to the following NI 43-101 technical report titled “NI 43-101 technical report and mineral resource estimate for the Barsele Property” with an effective date of February 21, 2019 prepared by Carl Pellettier, P.Geol., Harold Brisson, P.Eng., Stéphane Faure, P. Geol., and Vincent Nadeau-Benoit, P. Geol. of Innovexplor Inc. Val-d’or. (Québec).

For further information regarding the Kylmäkangas project, reference should be made to the following NI 43-101 technical report titled “NI 43-101 technical report and mineral resource estimate for the Kylmäkangas Gold Project” with an effective date of July 25, 2022 prepared by Eemeli Rantala, P.Geol., and Ove Klavér, Eur. Geol. of AFRY Norway AS.

For further information regarding the Långtjärn Project, reference should be made to the following NI 43-101 technical report titled “NI 43-101 technical report and mineral resource estimate for the Långtjärn property” with an effective date of June 30, 2020 prepared by Amanda Scott, M.Sc. of Scott Geological and Thomas Lindholm, M.Sc. of Fausimm of Geovista.

CAUTIONARY NOTE

Certain statements in this presentation are “forward-looking statements”, including within the meaning of applicable laws. All statements other than statements of historical fact included in this presentation, including, statements regarding the effect of the Proposed Transaction on First Nordic Metals’ resources, gold grades, metallurgies, and future plans and objectives of First Nordic Metals are forward-looking statements based on forecasts of future operational or financial results, estimates of amounts not yet determinable and assumptions of management that involve various risks and uncertainties. Any statements that express or involve discussions with respect to predictions, expectations, beliefs, plans, projections, objectives, assumptions or future events or performance (often, but not always, using words or phrases such as “expects” or “does not expect”, “is expected”, “anticipates” or “does not anticipate”, “plans”, “estimates” or “intends”, or stating that certain actions, events or results “may”, “could”, “would”, “might”, or “will” be taken, occur or be achieved) are not statements of historical fact and may be “forward-looking statements.” First Nordic Metals cautions that forward-looking information involves known and unknown risks, uncertainties and other factors that may cause actual results, performance or achievements to be materially different from those expressed or implied by such information, including, but not limited to, failure to obtain the necessary regulatory and other approvals; gold and silver price volatility; fluctuations in foreign exchange rates and interest rates; the impact of any hedging activities; discrepancies between actual and estimated production, between actual and estimated reserves and resources or between actual and estimated metallurgical recoveries; capital expenditure requirements; and the success of exploration and permitting activities. Although First Nordic Metals has attempted to identify important factors that could cause actual results, performance or achievements to differ materially from those contained in forward-looking information, there can be other factors that cause results, performance or achievements not to be as anticipated, estimated or intended. There can be no assurance that such information will prove to be accurate or that management’s expectations or estimates of future developments, circumstances or results will materialize. Accordingly, readers should not place undue reliance on forward-looking information.

Market data and other statistical information used throughout this Presentation are based on internal company research, independent industry publications, government publications, reports by market research firms or their published independent sources. Industry publications, governmental publications, market research surveys and forecasts generally state that the information contained therein has been obtained from sources believed to be reliable. Although First Nordic Metals believes such information is accurate and reliable, it has not independently verified any of the data from third party sources cited or used for our management’s industry estimates, nor has First Nordic Metals ascertained the underlying economic assumptions relied upon therein. While First Nordic Metals believes internal company estimates are reliable, such estimates have not been verified by any independent sources, and First Nordic Metals makes no representations as to the accuracy of such estimates.

THE NORDIC ADVANTAGE

Region is the leading producer of metals in Europe – Sweden #1, Finland #2

History of mining

Security of tenure

Taxation incentives - No mineral tax, 20.6% corporate tax rate

Low political risk - Mature, well-defined environmental & permitting procedures in a mining friendly country

Ranked by Fraser Institute as mining's "Top Jurisdictions to do Business" in 2024

FNM GOLD LINE BELT

Barsele Project

Strategic Partnership With Agnico Eagle Mines

Barsele
Current Resource Area

7 kms of Granodiorite

JV: 55% Agnico / 45% FNM

Nationally designated mining status

24,980 ha land package

165,936 meters / 453 holes diamond drilling

US\$55M
invested to date by Agnico Eagle

Free Carried
interest for FNM; Agnico can earn additional 15% through completion of a Pre-Feasibility Study

Opportunity
to collaborate and share technical expertise across entire belt

**AEM / FNM
JOINT VENTURE**

- Gold mineralization outline (>0.5 g/t Au envelope projected to surface from 300m depth)
- Granodiorite
- Volcanic rock Skellefte Gp.
- Sedimentary rock Supergroup
- Mining permit

Barsele Project | Long Section

One of Europe's largest development-stage gold deposits

AVAN ZONE

CENTRAL ZONE

SKIRÅSEN ZONE

Barsele Project | Cross Sections

Wide, stacked parallel zones allow for low-cost bulk underground mining

Barsele Project

Favorable deposit characteristics & significant upside potential

	Mineral Resource Estimate (2019)						
	Cut-off	Indicated			Inferred		
		Tonnage	Grade	Au	Tonnage	Grade	Au
	g/t	kt	g/t	koz	Kt	g/t	koz
Open Pit	0.5	3,452	1.32	147	1,819	1.59	93
UG – Bulk	1.5	1,442	2.53	117	8,759	2.58	728
UG –Bulk-Selective	1.8	684	2.75	60	14,917	2.64	1,265
TOTAL				324			2,086

Solid Bulk UG Grades Over Significant Widths

Mineralized ore lodes range from 10 m to > 100 m wide, strike of 3.5 km; multiple parallel zones of varying thickness on same levels = huge cost savings

Simple Metallurgy

Free-milling sulphide ore – met testing from all three zones yielded recoveries of 93-96%, of which 45-50% could be recovered via conventional gravity circuit

Obvious Resource Upside at Depth

Average resource depth is 550 m but drilling has intersected strong grades down to 925 m depth and remains open in all directions

Geophysical results infer a continuity of granodiorite host rock to at least 2.0 km depth

Additional Potential Upside along Strike

Current resource covers 3.6 km of strike along a potential 8.0 km mineralized trend

Grade Upside

Discovery of high-grade bonanza veins at Avan zone and subsequent remodeling would improve vs. 2019 resource

Regional targets

Targets Risberget, Norra, and Bastutrask + several others show compelling geochemistry and early drilling results

2024 Gold Mine Opex in Northern Sweden

Bulk underground mining costs & low processing set the region apart

- Mandalay Resources' Björkdal Mine is located ~225 km E of Barsele
- Operating since the 1980s
- Has had record cashflow generation through 2024
- Current electricity costs in Västerbotten are ~3.5c/kWh (hydro), among lowest globally
- Bulk underground mining costs are 20-30% cheaper than in Canada

*from Björkdal 2024 technical report

	Björkdal
	Västerbotten, SWE
<u>Operating details</u>	
UG Mining Method	longhole
Average UG gold grade	1.6 g/t
UG Mining Cost	\$25.43
Processing Method	mill-flot-concentrate-smelt
Gold Recovery	85-88%
Processing & Refining Cost	\$10.18
G&A Cost	\$8.77
Total Processing & G&A Cost	\$18.95

Barsele
Västerbotten, SWE

longhole
2.7 g/t

mill-CIL
92-95%

Target 1 - Paubäcken | Aida

+4km Target, Barsele look-alike, currently being diamond drilled

- Target structure is blind to surface under 10-20 m of glacial till; BoT (base-of-till) drilling is proven technique for testing bedrock anomalism under glacial till cover
- BoT drilling confirmed shallow gold mineralization across 1.5 km strike; at least 2.5 km identified corridor still open to N and S, still to be tested
- 2024 results include 2.05 g/t Au and 5.01 g/t Au - highest BoT result here to date
- 6 core holes (1,100 m) drilled in Phase 0 with significant success / discovery
- NEXT STEPS:**
 - 1Q25 – BoT drilling remaining corridor
 - 1Q25 – Phase 1 diamond drilling: 5-10,000 m

Aida Diamond Drilling Highlights (only 6 holes drilled):

**22.5 m @
2.40 g/t Au**
from 45 m

**4.70 m @
2.12 g/t Au**
from 79m

**14.55 m @
2.44 g/t Au**
from 142 m

**7.20 m @
1.35 g/t Au**
from 105 m

Targets 2 & 3 - Paubäcken | Brokojan & Harpsund

5.5 km geochemical anomaly, currently being BoT drilled

- B-horizon glacial till sampling has been completed on northern 2/3 of Paubäcken area (6,718 samples over 2022-24)
- Surface till sampling identified the Harpsund corridor, a 5.5 km As-Cu-Mo-Zn pathfinder anomaly coincident with historic ionic leach Au anomaly
- Anomalies are oriented in down-ice direction and coincident with favorable geology and prominent 2nd order structural corridor
- **NEXT STEPS:**
 - 1Q25 – BoT drilling of corridor: ~200 holes
 - 1H25 – Phase 1 diamond drilling: 5-10,000 m

Target 4 - Storjuktan | *Nippas*

5 km geochemical anomaly, currently being BoT drilled

- 4,357 B-horizon glacial till samples collected over the Nippas Target area in the central portion of the Storjuktan Project
- Surface till sampling identified a large 5.0 km by 1.0 km As-Cu-Mo-Zn pathfinder anomalies coincident with historic ionic leach Au anomaly
- Anomalies are oriented in the down-ice direction and are coincident with favorable geology and a prominent second order structural corridor
- 2H24 geochemical program returned four newly identified orogenic gold pathfinder anomalies
- **NEXT STEPS:**
 - 1Q25 – BoT drilling on Nippas target
 - 1H25 – Till sampling over entire greenstone belt area of project
 - 2H25 – Phase 1 diamond drilling: 5-10,000m

New Targets - Storjuktan

4 new multi-kilometric anomalies identified in 2025

- +17,000 B-horizon glacial till samples collected over the Storjuktan project area (outside of Nippas) in 2H24
- 4 distinct and cohesive gold pathfinder anomalies (As-Cu-Mo-Zn), 1.5-2 km by 1 km were newly identified
- Anomalies are all oriented in the down-ice direction and are coincident with favorable geology and a prominent second order structural corridor
- **NEXT STEPS:**
 - 1Q25 – Awaiting results from high-resolution airborne UAV magnetic survey over these targets
 - 2Q25 – Results from gold assays of glacial till samples over targets
 - 2H25 – BoT drilling on targets prior to diamond drilling

Key Management

Taj Singh

CEO & Director

B.Eng, M.Eng (Mining, Metallurgy), CPA w/ 24 years experience in mining

Co-Founder, President & CEO **Discovery Silver**

Founding team member & Lead Director **GT Gold** (acquired by Newmont Mining)

Former VP at **Timmins Gold**, Research Analyst at **Macquarie** + 10 yrs engineering at **Inco / Vale**

Adam Cegielski

President

B.Sc. (App. Biochemistry)

Founding team member at **Cayden Resources** (acquired by Agnico), **Keegan Resources**

Co-founder and CEO of **Gold Line Resources** (FNM)

25 years experience, has raised over \$100M across various sectors

Benjamin Gelber

Head of Exploration

M.Sc. Economic Geology, P.Geo

Founding team member & Exploration Manager at **Keegan Resources** (Galiano Gold)

Former **Barrick Gold** Exploration Manager, Guyana

Specialist in orogenic gold systems and greenstone belts

John Eren

VP Corporate Development

HBA (Economics) with Over 20 years experience in mining

Founding team member & IR at **Keegan Resources** (now Galiano Gold) and **Cayden Resources** (acquired by Agnico)

Former Business Development at **Auryn Resources** (Fury Gold Mines)

Non-executive Directors

Toby Pierce

Chairman

B.Sc. Geology, MBA

Currently CEO of **Somerset Energy**

Former CEO of **TAG Oil** (10 years),
Head of Research, **GMP Securities** (London)

Co-founder of **Gold Line Resources** (FNM)

Founder of several juniors,
including **Benchmark Metals** (Thesis Gold)

Henrik Lundin

Director

B.Sc. Petroleum Engineering

Swedish citizen, 19 years in
natural resource sector

Formerly **Lundin Energy**, currently
Sr. Engineer at **Aker BP**

Former Chairman of **Gold Line Resources** (FNM)

Marc Legault

Director

Retired Engineer (P.Eng) and
geologist (P.Geo)

34-year career at **Agnico Eagle**
in various exploration,
operations, and management
positions,

Retired as SVP from Agnico in
2022

Gary Cope

Director

Founder & CEO of **Barsele Minerals** (10 years)

Significant shareholder of **FNM**,
35+ years Capital Markets
experience

Founder & CEO of **Orko Silver**
(acquired by Coeur Mining)

Jeff Couch

Director

Business and law degrees from
Canada, now UK-based

Acting CEO of **Lydian Mining**
and **Alufer Mining** (owned by
PE)

Former Head of Investment
Banking, Europe for **BMO Capital Markets**

Former banker at **Credit Suisse, Citigroup**

Appendix

ADDITIONAL INFORMATION

Geochemistry | Barsele vs. Target 2/3 & 4

Oijärvi Project

Limited exploration historically has been completed beyond the Kylmäkangas resource footprint

Contains several zones of mineralization, highlighted by the drill-defined **Kylmäkangas** deposit

Regional and local scale zones of structural complexity favourable for hosting potentially large Au deposits are present, with many still untested and the shear corridor remains open in all directions

The Oijärvi Greenstone Belt shares similar characteristics to those found elsewhere in Finland and in the Canadian Shield

Oijärvi Project

Kylmäkangas Deposit

	Mineral Resource Estimate (2022)						
	Tonnage	AuEq	Au	Ag	AuEq	Au	Ag
	Mt	g/t	g/t	g/t	Koz	Koz	Koz
Indicated	1.07	4.6	4.1	35.4	159	143	1,220
Inferred	1.63	2.9	2.7	15.2	152	142	795
TOTAL	2.70	3.6	3.3	23.2	311	285	2,015

- Shear zone hosted orogenic gold deposit
- Resource covers 1.5 km of strike; same mineralization + grades hit 2.5 km away W along high deformation shear corridor
- Current resource estimate is based on 67 drill holes totaling 17,678 m
- Drilled to average depth of only 215 m; significant depth potential exists
- 11 m of 23 g/t Au, 126 g/t Ag @ 102 m

Regional Targets

- 📍 Kylmäkangas West
- 📍 Karahka
- 📍 Kompsa

Drilled Au grades between 1-97 g/t Au

Oijärvi Project

Kylmäkangas Deposit

The Kylmäkangas Au-Ag deposit is open to depth and down plunge and there is the potential for additional down dip zones.

Known Mineralization

1.5 KM STRIKE

within a NE/SW striking high deformation shear corridor

NEXT STEPS:

- High resolution UAV magnetic geophysics survey aimed at targeting similar anomalies along strike and on parallel shear corridors within the Oijärvi Greenstone Belt
- Diamond drilling to follow up on extensions of lodes & regionally
